NEW PRODUCT RELEASE

MAXI/GUARD® PINKEYE BACTERIN

Now Approved for Single Dose Administration!

Addison Biological Laboratory, Inc. is pleased to announce single dose label approval for **MAXI/GUARD®** Pinkeye Bacterin.

Respected for prevention of the pain and costs of pinkeye treatment, **MAXI/GUARD®**'s new single dose administration offers additional convenience value.

MAXI/GUARD®'s advantages include:

- Extremely low endotoxin levels (strong safety record)
- Safe to use in combination with other gram negative vaccines
- 8 *M. bovis* isolates – Twice the isolates of competitive pinkeye bacterins
- Over 90% efficacy*
- Easy syringeability
- Minimal injection site reactions
- U.S.D.A. approved for subcutaneous administration

MAXI/GUARD® is now easier to use for preventing:

- ✓ Product losses
- ✓ Treatment stress
- ✓ Antibiotic cost
- ✓ Excessive labor
- ✓ Injection site blemishes
